PreSSUB II @ ESOC 2016 Conclusions

Telemedicine in-ambulance 24/7 is **organizable**

Telemedicine in-ambulance is **safe & technically reliable**

Call to Imaging time: 46 min. Vs 66 min.

All Cause Mortality at day 90: 14,3% vs. 15,6%

Proportion of **Successful interventions:** 96,2%

Added Value for All Stakeholders

Patients

Higher Chances of independency & survival

Ambulance Staff

Adequate unassisted acute care

Society

Reduced human & economic burden

Hospital

Acute Care with a **cost reduction**
(~750€/patient just for stroke*)

Medical Expert

Effective & flexible resource allocation for
optimised care

* Data requires validation in ongoing/upcoming clinical trials

Available information for hospital staff

Neurologist

Relevant Information:

- Time of symptom onset,
- Contraindication,
- Stroke Severity,
- Medication,
- Anamnesys,
- ...

Used to:

- Asses if patient is candidate for Thrombolysis / Thrombectomy

ER Floor Manager

Relevant Information:

- Time of arrival,
- Vital parameters,
- ...

Used to:

- Verify stability of patient,
- Prepare to take patient as fast as possible to CT

Radiologist

Relevant Information:

- Age,
- Name,
- Gender,
- ...

Used to:

- do the registration in the CT
- be able to start CT faster

Clinicians Testimonials

Clinical

“Decision support generating semi-automatic alert & report leads to optimal preparation of the in-hospital team **upon arrival**”

“Revised clinical pathway with clear shift to pre-hospital phase, **leads to essential time gain**”

“**Direct** multidisciplinary (patient, nurse, caregivers, ...) input allows to obtain high amount of patient data **even during short ambulance transport**”

Technical

“Easy patient interaction is ensured through qualitative audio/video **connection**”

“**It's** Easy-to-use & quickly ‘**up and running**’”

“**There is** no need of technical **know how**”

Private

“**The freedom or reach & greater efficiency** have a positive impact on the work/private life balance”

The Zebra Academy Team

Helio Fernandez
Background in telecom engineering, coordinator of the technical development

Prof. Dr. Raf Brouns
Neurologist & researcher with a focus on acute stroke care

PhD Andre Convents
Innovation manager at P&G driving strategy, innovation and valorization

Prof. Dr. Ir. Guy Nagels
Head of Neurology & director of research & development, specialised in MS

Bastien Ritzen
CEO at Zebra Academy and driving business development
