The Local Organizing committee and the SRS leadership are pleased to invite you to the 24th International Symposium on Radiopharmaceutical Sciences. It will be held in Nantes at La Cité Congress Center in May 16-21, 2021. Twenty nine years after the 9th symposium in Paris, the biennial ISRS meeting comes back to France.

We ambition to propose an outstanding scientific program and a unique opportunity to connect you with the global radiopharmaceutical sciences community, meet people and share ideas, in a large and friendly venue located in the center of Nantes. A national Local Organizing Committee (LOC) has been created and gathers the main national French academic and industrial key actors in the field of radioisotope and radiopharmaceutical research and development. We are all committed to work closely with the SRS, to make your ISRS 2021 an enriching scientific experience.

Nantes is the 6th largest city in France and one of the nicest. Nantes Atlantique Airport (20 minutes to downtown with the shuttle airport) is connected with nonstop flights to more than 60 cities in France, Europe and overseas. Nantes is also accessible by the TGV high speed train from Paris-Gare Montparnasse (2 hours) and from Paris-Charles de Gaulle airport (3 hours).

The Local Organizing Committee looks forward to welcoming you in Nantes, France in 2021.
